## BERLIN IS BOMBED BY POLES

### Another British Ship Torpedoed by German Submarine

#### Bosnia Sunk; But Crew of 23 Taken Off by a Tanker

Arkansas Girl Reported Safe After Loss of Liner Athenia

#### THEY SAW THE SUB

Passengers Reported U-Boat Fired Torpedo, Then Shelled Liner

LIVERPOOL, Eng.—(AP)—The Cunard Line announced Tuesday its steamer Bosnia had been sunk by a submarine. Her crew of 23 was rescued by a Norwegian tanker.

Arkansas Girl Safe  
LITTLE ROCK—(AP)—The name of "L. Lucas" appeared Tuesday in the list of survivors of the Athenia disaster landed at Greenock, Scotland, indicating the rescue of Miss Lucille Lucas of Clarksville, Ark., who was believed to have been aboard the torpedoed ship.

Passengers Saw Submarine  
GALWAY, Ireland—(AP)—The master of the stricken British liner Athenia, sunk Sunday, said on his arrival here Tuesday that the ship was "hit by a torpedo which went through the galley and into the engine room, causing a heavy loss of life."

The captain, James Cook, brought here with 430 other survivors of the first submarine disaster of the war, said that immediately after the torpedo was fired the submarine rose to the surface and shelled the Athenia. In Greenock, Scotland, 600 survivors arrived shaken and weeping. One declared a German submarine fired two shells at the ship while the life-boats were being launched.

Two hundred of those arriving at Greenock were injured. No one could say definitely how many had been killed or drowned in the disaster.

They Smile—It Kills 'Em  
BELLO HORIZONTE, Brazil—(AP)—A "smile" society has been organized here, its members bound to wear a smile in all public places, particularly when they encounter gloomy-looking persons.

Cotton  
NEW YORK—(AP)—October cotton opened Tuesday at 8.78 and closed at 8.75-76. Middling spot 9.25.

#### European Capitals Are Only About Hour Apart

By the Associated Press  
Here are the minutes and miles that separate Europe's capitals from raids by bombing planes, assuming an average speed of 200 miles an hour:  
France to Berlin, two hours, 400 miles.  
Germany to London, 1:23; 275 miles.  
Germany to Paris, 1:06; 220 miles.  
England to Berlin, 2:45; 550 miles.  
Poland to Berlin, 2:7; 50 miles.  
Germany's axis partner, Italy, is 340 miles and one hour and 42 minutes from Paris. A French base in Corsica would be but 54 minutes and 180 miles from Rome, if it could be maintained in wartime.

#### President Signs Neutrality Order

Proclamation Effective at Once—Commodity Price Advance

WASHINGTON—(AP)—President Roosevelt signed Tuesday a proclamation of American neutrality in the European war.

White House officials said it would go into effect as soon as Secretary of State Hull affixed his signature and the official seal.

Prices Move Up  
NEW YORK—(AP)—Large-scale buying swept into commodities and shares of corporations culminated in benefit from war demand as Wall Street markets resumed trading Tuesday for the first time since the declaration of European war.

Rubber, cotton, sugar and cocoa were among the rapid gainers.

#### Emmet Negro Is Held On Stabbing Charge

PRESCOTT, Ark.—Harrison Williams, negro, of Emmet, was jailed here Sunday and charged with assault with intent to kill as the result of a fight in which he stabbed Willie Byrd, negro, in the back with an ice pick.

The fracas occurred in the negro quarters at Emmet Sunday morning. Williams stabbed Byrd three times and the pick was broken off in Byrd's back, officers said.

Insert life exists as high as four miles above the surface of the earth.

#### Convoy, Escorted by Planes, Is Best "Sub" Protection

Submarines Improved Since 1914, But So Are Defense Devices

#### GERMANY WEAKER

She Hasn't the Dreadnaughts of 1914 to Keep British Busy

Third of four Catton stories on America's position in the current crisis.

By BRUCE CATTON  
NEA Washington Correspondent  
WASHINGTON—It was mostly the submarine that got the United States into the last European war. Whether there will be unrestricted submarine warfare on neutral commerce in the new war is anybody's guess; if there is, everybody involved is likely to find that the picture is a good deal different than it was before.

While the sub is a better fighting machine than it was in 1917, methods of combatting it have improved, too. Experts in the Navy Department here believe that, if Germany seeks to put a submarine blockade around England today, the job will be a good deal tougher than it was the last time.

The convoy system is the best method yet found to break up submarine attacks on merchant shipping. The British will unquestionably establish it at once.

And, it is suggested here that the convoy's effectiveness would be greatly increased by putting at least one aircraft-carrying cruiser in every escort. As a spotter of lurking submarines, the airplane would be of great value, subs thus spotted could be run down and sunk by destroyers, and the convoy could proceed unharmed.

#### German Fleet Not So Strong

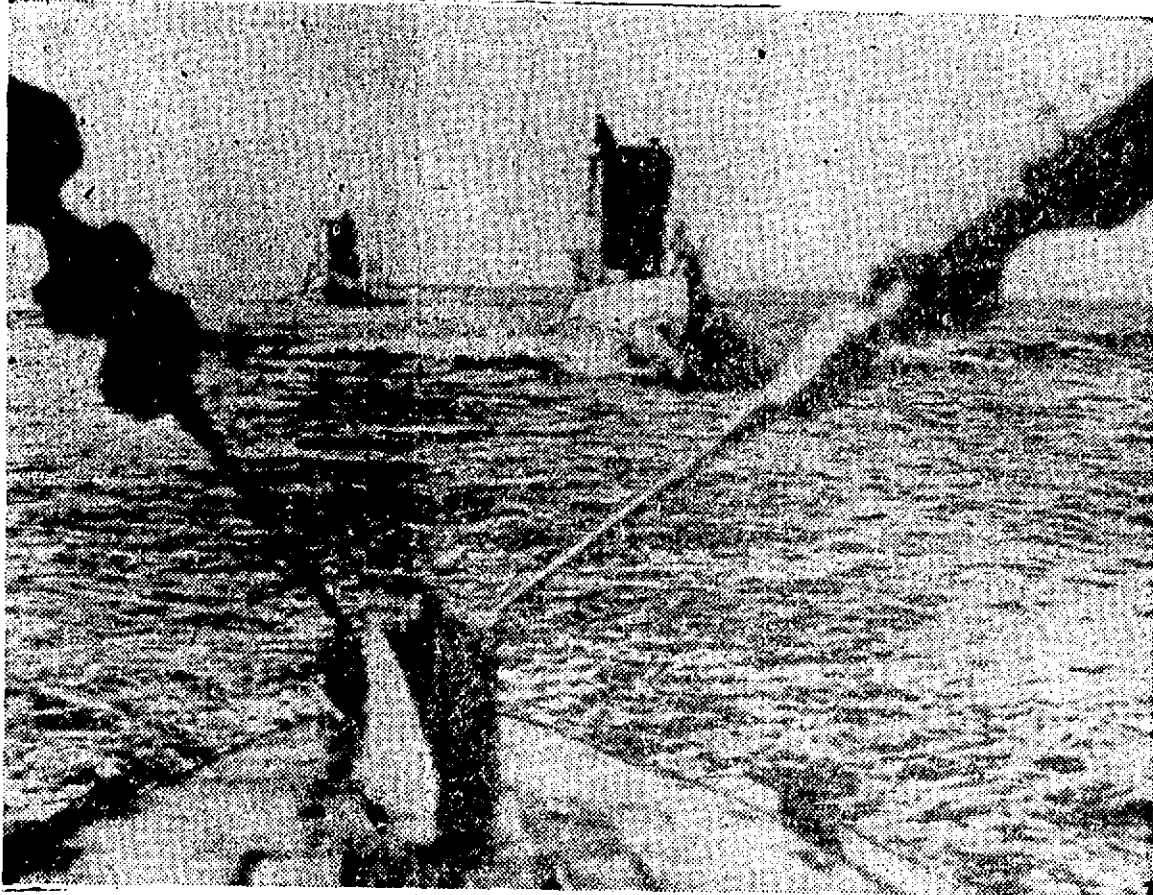

Another factor, as naval men here see it, is that Germany does not have the battle fleet it had before. In the World War, the German fleet accomplished little positively, but it did immobilize the greater part of the British fleet.

Today a smaller proportion of Britain's navy will be needed to watch the German battle fleet. The rest can strengthen the convoy system, hunt down roving submarines or other commerce destroyers, and patrol shipping lanes.

On the other side of the picture there is the fact that the submarine

(Continued on Page Three)

#### First Pictures From the War

Germany's attacking power at sea is shown in this striking picture of German submarines in formation. Photo just received in New York from London where it was received from Germany just before outbreak of hostilities. Such submarines are believed to have torpedoed the Athenia.—Acme Telephoto.

In the chancellery in Berlin, Adolph Hitler signs his refusal to comply with British demands that he quit Poland, thus plunging Europe into what may well be a general war.—Acme Radiotelephoto.

#### Site for Legion Hut to Be Asked

Kyler and Thomas to Present Legal Description to City Council

Legal title to a plot of ground at Fair Park will be asked of the city council Tuesday night by H. O. Kyler, post commander and C. O. Thomas, chairman of the building committee of the Leslie Huddleston post of American Legion.

Mr. Kyler and Mr. Thomas, meeting with the council August 15, explained details of the proposed building and asked permission to construct the building north of the park lake and approximately 150 feet west of the Boy Scout Hut.

At that meeting, Mayor W. S. Atkins and the council expressed favor of such a building, but deferred action until a legal description was presented.

If a deed to the property or long-time lease is granted Tuesday night, the legion post is expected to discuss plans for a financial campaign at its regular meeting Thursday night at 8 o'clock. The legion meets at Hope city hall.

#### A Thought

Sin is never at a stay; if we do not retreat from it, we shall advance in it; and the further on we go, the more we have to come back.—Barrow.

#### Two Big Industrial Towns Fall Before Advancing Germans

French Contact German Armies and Report Advance Into Reich's Territory

COPENHAGEN, Denmark—(AP)—Berlin was bombed Tuesday night by a squadron of 30 Polish planes, a Polish radio announcement said. (No further details were learned for this dispatch, received in Hope at 3:30 p. m. Tuesday.)

FLEEING WARSAW  
BERLIN, Germany—(AP)—Germany Tuesday announced the capture of two rich Polish industrial cities, Katowice and Chorzow, near the Polish-German frontier in Silesia.

Both towns, on the direct route to Krakow, Poland's ancient capital, had been virtually surrounded by previous attacks where the German border bluges into southwestern Poland, but the final thrust against them had been delayed.

The Germans said they feared the Poles would blow up the mines and steel rolling mills which they said had been mined with explosives; but the Poles were said to have been surprised and fled without damaging valuable property.

The capture of the two towns gives Germany control of the highly important Upper Silesian industrial region. At the same time German authorities declared 10 British bombers were shot down Monday when they raided the German fleet.

POLES FLEEING WARSAW  
WARSAW, Poland—(AP)—Thousands of Poles and several hundred foreigners, including most of the Americans remaining here, left the Polish capital Tuesday, fleeing into the interior beyond the reach of the German armies and German planes.

There were reports that officials of the government itself might leave within a few hours.

Anthony Drexel, Jr., United States ambassador, his family and most of his staff left during the day in a motor caravan flying American flags.

German planes made two raids on Warsaw Tuesday. The first raid of the day came while reports were being received indicating that Polish defense lines were being shortened to stiffen the positions now held.

FRENCH ADVANCE  
PARIS, France—(AP)—The French government announced Tuesday French forces had made contact with German troops on the Western front and had penetrated into German territory.

Semi-official Paris radio reports said there had been trouble in Germany, disorders in Cologne and Essen, as well as in areas of all Czechoslovakia.

Dispatches from Copenhagen reported naval fighting off the coast of Denmark.

FRENCH MOVING UP  
PARIS, France—(AP)—France pursued the second day of military operations against Germany Tuesday with an official announcement that "movements would develop normally for the entire land, sea and air forces." Germany replied with an aerial invasion which brought an early-morning air-raid alarm to Paris.

Later, an official military source said the planes had come on a "scouting trip" without dropping bombs. Official advices reported "stubborn fighting" on the German-Polish eastern front.

Three U. S. Seaplanes Finally Reported Safe  
CRISTOBAL, Canal Zone—(AP)—Army authorities announced Tuesday that three United States Army planes previously reported missing over Costa Rica had been found with all personnel aboard safe.

British Bomb Germans  
LONDON, Eng.—(AP)—Great Britain countered the sinking of the passenger liner Athenia—by bombing two German battleships at the entrance of the Kiel canal in North Germany late Monday.

A ministry of Information statement reported that the German ships, off Wilhelmshafen and at Brunsbuttel in Schleswig-Holstein, were damaged severely. It added that the British Royal Air Force units which carried out the operation suffered "some casualties" from aircraft attack and anti-aircraft gunfire.

It was the first report of actual fighting between British and German forces.

Reuter, British news agency, quoted a German dispatch saying that five British bombers carrying out the operation were brought down by German anti-aircraft batteries.

Leaflets distributed earlier Monday by the Royal Air Force over Germany, were entitled "An appeal to the German People" and urged "Fight for your freedom—get rid of Hitler."

These planes, said an announcement, carried out "extensive reconnaissance over northern and western Germany and were not engaged by any enemy aircraft."

Messages to Germans  
King George sent messages to the fleet, army and air force Monday.

## Old Folks at Home

When the United States was young, and they were taking the first census, it was found that there were more children in the country than adults—about 10 children for every eight adults.

That is nearly 150 years ago. Today, for every 10 children there are 20 adults. It is hard to imagine a more complete shift in the makeup of a population in what is, historically speaking, a rather short time.

So when we think of the problem of youth, the difficulties faced by young people in starting a career, it is well to keep this fact in mind. In the old days they were entering a world with comparatively few older people in its productive positions. Today they enter one loaded with a superfluity of older people who are living longer and hanging on to their jobs longer and tighter than ever before.

Which means that activities like the CCC and the various projects of the National Youth Administration will probably be with us for a good long time, no matter what administration sits in Washington, and no matter what degree of relative prosperity shall have been achieved.

## The Long Lag

One of the discouraging things about big government undertakings is that long after their objectives have been accomplished or failed to be accomplished, the payments to the piper still go on.

The United States is being asked to pay pensions to two daughters of veterans of the War of 1812, and the families of veterans of the Mexican War of 1846 are still drawing on the public treasury.

The processing tax agricultural experiment is over—shut off when the whole business was declared unconstitutional after AAA had collected \$963,000,000 from such sources.

But it is not ended. Now come the claims for refunds, 29,000 of them, totaling \$559,000,000. Only 12,600 claims for \$4,000,000 have thus far been allowed, with 10,237 claims for \$37,000,000 rejected.

The experiment is ended, but the bookkeeping lingers on.

### Amount of Sleep, Time to Get It, Benefits Received, All Vary in Adults

This is the second of four articles on sleep. The question as to how long an adult ought to sleep has never been satisfactorily answered, and probably never will be, because of the differences in human beings.

It is hard to study the matter because many people get enough sleep and complain that they do not rest; others do not get enough sleep and say nothing about it. Some people sleep too long. Experts say that over-sleeping is just as bad as over-eating.

The mental aspects of sleep have been insufficiently studied. Some people have a good night's sleep and still wake up moody and mean. Others will sleep only five or six hours and awaken in the best of spirits, quite refreshed.

There has been some study of the optimum time for going to bed. One expert says that an hour before midnight is worth two after midnight.

Another expert says that there are two types of sleepers. One is tired in the evening, quickly falls asleep, soon reaches the greatest depth of sleep, and wakes up refreshed and well rested. The other falls asleep easily, reaches the greatest depth of sleep during the early hours, wakes up feeling tired.

Some people have two phases of sleep. They awaken from a first phase but are not quite rested. After lying awake for a brief time they fall asleep again and awaken shortly quite refreshed.

Any effort that upsets the routine of daily life may bring about a rest-

less night. The eating of foods to which people are sensitive or which they find difficult to digest may result in restless sleep. Authorities have found that an empty stomach is irritable and that any light snack

taken around bedtime tends to enhance restful sleep. Yet some people are restless if they eat or drink anything at all before going to bed.

NEXT: Sleeping equipment.

## HIGHLIGHTS FROM LATEST BOOKS

Winston Churchill Warns of Delay in concluding Anglo-Russian Alliance

Bitterly prophetic today seem the words of Winston Churchill in "Step by Step" (Putnam: \$3). The book is a collection of weekly let-

ters on the shifting political scene of Europe from March 12, 1936, to May 15, 1939, presented as written at the moment with connecting links of brief news bulletins of the times. This makes a chronological account. This section, written May 3, while Britain was trying to conclude the Russian alliance, is prophetic indeed: Above all, time must not be lost. Ten or 12 days have already passed since the Russian offer was made. The British people, who have now at the sacrifice of honored, ingrained customs, accepted the principle of compulsory military service, have a right, in conjunction with the French Republic, to call upon Poland not to place obstacles in the way of a com-

mon cause. Not only must the full co-operation of Russia be accepted, but the three Baltic states, Lithuania, Latvia, and Estonia, must also be brought in to associate. To these three countries of warlike people, possessing together armies totaling perhaps 20 divisions of warlike troops, a friendly Russia supplying munitions and other aid is essential. There is no means of maintaining an Eastern front against Nazi aggression without the active aid of Russia. Russian interests are deeply concerned in preventing Herr Hitler's designs in Eastern Europe. It should still be possible to range all the states and peoples from the Baltic to the Black Sea in one solid

front against a new outrage or invasion. Such a front, with resolute and efficient military arrangements, combined with the fire of the Western Powers, may yet confront Hitler, Goerrin, Himmler, Ribbentrop, Goebbels and Co. with forces the German people would be reluctant to challenge.

Wilson Rides Sou

CINCINNATI—Observers say one of the main reasons why the Cincinnati Reds' coach, who has 16-year-old son Bob, who pitches in batting practice. The youngster, big and still growing, travels with the team and hopes some day to make the grade in the majors.

## OUT OUR WAY

## ANSWER TO CRANIUM CRACKER

Problems on Page One  
A well-known theorem of geometry is that the circumference of a circle is about three and one seventh times its diameter. If the distance across the lake is 3 1/2 miles, the distance around will be three and one seventh of three and one-half, or 11 miles, and half way around will be 5 1/2 miles.  
If he rows six miles per hour, or 60 min., he will go one mile in 10 min., or 3 1/2 miles in 35 min., by water. If he drives 10 miles per hour, he will drive one mile in six min., or 50 miles in 30 min. Assuming that his horse is hitched and ready, he can drive the quicker, especially as he can drive directly to the doctor's office but would have to walk there from the boat.

Tomorrow: Combinations of numbers.

**A Prayer Rug**  
We're braiding rugs for rugs today. Blending the pieces, dull and gray; And while my fingers deftly ply, My thoughts to green and far fields fly.

This bit of blue, soft shimmering, Brings back a butterfly's bright wings; The sateen's from a shell-pink rose That drew and rain and sunshine knew;

This gray stuff's from a field-mouse hole; When mouse peered out he looked so droll; With quilt from a yellow warbler's feather

I sew the braided bits together, And on my rug, with thistle floss, The Earth's dear name I then emboss. Now that I've fastened this last row, I turn my face to the sunset glow, I spread my rug on the close clipped sod

And breathe a prayer to the Living God; "In the plumage of the golden eagle, In the lowly rag-weed's stem, I have glimpsed Thy presence regal, I have touched Thy garment's hem," Selected.

Miss Ellen Carigan was a Monday visitor in Camden, Ark.

Miss Ruth Taylor of Martin, Tenn. after a vacation with home folks has arrived in the city to resume her position of Home Ec teacher in the Hope High School.

The Jo Vesey Circle of the W. M. S. First Methodist church held its September meeting on Monday evening at the home of Mrs. Hendrix Spraggins as joint hostess. In the absence of the circle leader, Miss John Vesey opened the meeting and desired over the business period, at which time, Mrs. Hendrix Spraggins was elected as leader, taking place of Miss Mary Billingsly who served as Secretary for the unexpired term in the place of Mrs. Dennington. Mrs. Kelly Bryant presented a very interesting program with special music by Misses Harriet Story and Mary Louise Keith, with Mrs. Spraggins at the piano. At the close of the meeting a most tempting dessert plate was served.

Mr. and Mrs. K. G. McKee had as

week end guests, Mrs. Taylor Stuart of Hot Springs, Mr. and Mrs. Jack Meek and daughter, Carolyn of Bradley and Miss Helen McKee of Fort Worth.

After a summer's vacation, the Pat Cleburne chapter U. D. C. will resume activities at three o'clock Thursday afternoon at the home of Mrs. J. F. Haneagan, S. 1st street, with Mrs. J. F. Gorin as joint hostess. A full attendance is urged as important business will come before this meeting.

Misses Johnny and Mickey Boyett have returned from a visit to Houston, Galveston and other Texas points of interest.

The regular monthly meeting of the W. M. S. First Christian church was held on Monday afternoon at the church, with the president Mrs. C. S. Lowthrop presiding. Mrs. Fred Deitz brought a very helpful devotional and led the program on "The Effect of Extreme Nationalism." Mrs. Lowthrop and Mrs. Shannon led discussions on "How Christianity May Overcome Nationalism," and Mrs. B. L. Rettig closed the program with a vocal selection.

Mr. and Mrs. Bruce McKee of Little Rock were week end guests of Mr. and Mrs. Dorsey McKee, Sr.

The Alma Kyler Circle of the Methodist church held its monthly meeting at the home of Mrs. Rob Jones on West Sixth street, Monday afternoon, at four o'clock. The theme if the program, led by Mrs. Buckley was New Horizons of Home Mission Service. Ephesians 3:14-21 was read in prayer after which Mrs. Buckley gave the meditation from the World Outlook, "The Bonds of Living Fellowship." Mrs. Upton and Mrs. Haneagan gave very interesting topics on "New Horizons of Home Mission Service." The program ended with the Benediction. The hostess served pie A-La-Made to nine members and four children.

Mr. and Mrs. A. W. Moody of Hope, R. 1, living in the Liberty Hill settlement announced the arrival of a boy, born August 31. He has been christened Loyce Ray. Both mother and baby, are doing nicely.

Mr. and Mrs. K. G. McKee had as

week end guests, Mrs. Taylor Stuart of Hot Springs, Mr. and Mrs. Jack Meek and daughter, Carolyn of Bradley and Miss Helen McKee of Fort Worth.

## Navy Changes Since Last War

The navy picture has changed since days of World War. Today sleeker subs, long-range guns, aircraft aid fleet to patrol the seas.

### Convoy, Escorted

(Continued from Page One)

now is a more effective weapon. It can cruise farther, stay down longer, travel faster, and shoot straighter than it could 20 years ago. In other words, its chances of getting into a commerce lane and of doing damage after it gets there are greater—sub for sub—than before.

Germany today is believed to have approximately 50 submarines in service—nearly time as many as in 1914. Some 20 more are known to be under construction, and it is assumed that production can be stepped up to the World War basis of 10 per month without much delay.

Just what the airplane can do as a commerce raider is not entirely clear. Naval men here are inclined to doubt that it can be very effective, except in limited, localized areas. Merchant ships, they say, can easily be armed with anti-aircraft batteries; convoy escorts will be well able to keep single

planes away from their charges; a plane will not accomplish much by roving the open seas, and if it seeks to operate close to enemy ports, the enemy's own air force will be at hand to beat it off.

American Navy Has 350 "Fighters" As far as the American navy is concerned, the state of preparedness today is considered—relatively—slightly less satisfactory than it was in 1917.

This does not apply to personnel, nor to the quality of equipment. In both of those fields, the navy is as well prepared as any—if not a little better. But navy men point out that a much smaller proportion of the nation's total strength today is composed of capital ships than was the case when the last war began.

Today the United States fleet comprises about 350 ships which the navy is willing to classify as "fighters," the navy has about 200 others, but they're useless in any actual combat.

Twenty-five years ago the navy had only 165 fighting ships—but it has today. It had 30 then; it has 15 today—and one of the 15 is too old for active service.

The other side of that, of course, is the fact that no other fleet has as many battleships now as it had in the last war. Great Britain, for instance, has 18 dreadnaughts now as compared with 60 in 1917; Germany has seven, as compared with 33.

Nevertheless, the navy feels that the fact that no other fleet has as many battleships now as it had in the last war, is a good thing. It is a sign that the navy is as well prepared as any—if not a little better. But navy men point out that a much smaller proportion of the nation's total strength today is composed of capital ships than was the case when the last war began.

be more ships to convoy, the conveying will naturally take more of the navy's ships, time, and effort.

One extremely interesting problem—so far totally unanswered—is the extent to which this government might be willing to protect its merchant ships if it remains neutral and unrestricted submarine warfare, as it did 22 years ago?

Will it convoy its ships to their destinations, with its warships ordered to fight off any submarine attacks? If so, how long will it remain a neutral?

In other words, will unrestricted submarine warfare again take America into a European war as it did 22 years ago?

NEXT: The army.

### Two Big Industries

(Continued From Page One)

night praising their traditions and pointing out their grave responsibilities. Prime Minister Chamberlain broadcast a series of messages to the Germans in their language asserting Britain had no quarrel with the German people but that the fight was against "a tyrannical regime which has betrayed not only its own people but the whole of Western civilization."

French on Attack PARIS, France.—(AP)—A French General Staff statement announced Monday night that "contact has been made in the front" with the German forces. The statement said that France's naval forces "have taken up the posts assigned to them," and "the air force has proceeded to do the necessary scouting."

Well-informed private sources believed the brunt of the French attack was delivered along the "Burgundy Gate"—a passageway between the Vosges and the Alps, just north of the three-cornered junction of France, Germany and Switzerland. It was believed a supplementary attack was begun along the Moselle valley at the northernmost end of the French-German border.

The Burgundy Gate, historic route of ancient warfare between the Germans and the Franks, is a 20-mile-wide valley running northeastward from France to the famous German Black Forest region. The city of Mulhouse stands directly in the center of the valley on the German-French frontier.

Foreign military observers in Paris long have considered that if Italy remained neutral, the French General Staff could launch a general offensive against the German line to force Germany to divert troops from the eastern to the western front. Experts believed that if Italy entered the war the first Allied drive would be against her northwestern frontiers.

Protection Job Is Big One Protection of American commerce will be a harder job than it was last time for the simple reason that there is more American commerce to protect.

America's merchant marine is considerably more extensive now than it was 25 years ago. Since there will

## Big Still Captured South of Columbus

14-Barrel Outfit Raided By Baker, Middlebrooks and Copeland

The largest moonshine whiskey still captured in Hempstead county in recent years was seized about 11 o'clock Monday night nine miles south of Columbus by Sheriff C. E. Baker, Deputy Tom Middlebrooks and Chief of Police Sweeney Copeland.

The still was a 14-barrel outfit, completely made of iron with the exception of the copper worm. The furnace was fired and the still would have been in operation within a short time—had officers not interfered.

Two negro brothers were captured at the scene. They are Monroe Muldrow, six feet 7 and a half inch negro weighing 190 pounds, and his brother, Pasline Muldrow. They were lodged in the Washington jail about 2 a. m. Tuesday.

At the scene of the still officers found nine barrels of mash, 100 pounds of sugar, 24 half-gallon jugs and jars, 100 pounds of chops, and a gallon and a half of moonshine liquor that had been run off previously to the time of the raid.

The still and equipment was destroyed. Officers also reported they found additional still equipment in an automobile nearby. It was the first still to be captured in that locality in several years.

It had not been decided Tuesday morning whether the negroes would face a federal charge or be tried in Hempstead county. In the future, Sheriff Baker said, all moonshine operators and whiskey law violators will be turned over to federal authorities, where the case warrants it.

Sister of Garrett Whiteside Dies Mrs. W. E. Brown Succumbs at 63—Funeral Held at Mineral Springs

Garrett Whiteside, secretary to Senator Hattie W. Caraway, returned to Howard county from Washington, D. C., this week-end to attend the funeral of his sister, Mrs. W. E. Brown at Mineral Springs.

Mrs. Brown, widow of a well-known publisher of Nashville and Mineral Springs newspapers, died at Mineral Springs last Friday at the age of 63. The funeral was held there Sunday, with the Rev. Mr. Martin, Methodist minister, officiating.

She is survived by one son, Edgar Brown, and her brother, Mr. Whiteside.

Complaints of Tax Assessments Will Be Heard By Board

The Hempstead county equalization board will meet at Hope city hall Friday and Saturday of this week to hear any complaint of tax assessments.

The board will also be in session three days next week, Thursday, Friday and Saturday, it was announced by County Judge Frank Rider.

Temperature 103 Degrees at 2:30

Monday's High Recording Is 104 Degrees, Station Reports

The heat wave continued Tuesday and showed indications of topping Monday's 104 degrees.

At 2:30 o'clock Tuesday afternoon the mercury had risen to 103 degrees on the official instruments at the Fruit & Truck Branch Experiment station.

The temperature usually reaches its maximum about 4 o'clock in the afternoon, attaches of the station said.

Reporter Covered the California Gold Rush

CHICO, Calif.—(AP)—At 95, Henry Nelson can look back on a newspaper career shared by few of any living men. He reported the mining news of the early California and Nevada gold camps, at the time that Mark Twain was serving his own literary apprenticeship in the same towns.

"It's Unloaded"

FULTON, Mo.—(AP)—Isaac R. Bred, Fulton antique dealer, says most of the ancient guns he buys are loaded. But sellers usually say they are sure they are empty.

Youth Slightly Hurt In Fall From Bridge

A youth who gave his name as Charles Davis, 22, Louisville, Ky., was brought to Josephine hospital Tuesday morning in a Hope Furniture Co. ambulance after he was found lying beside a bridge on Highway 67 two miles northeast of Hope.

The youth told hospital attendants that he fell from the bridge after a large truck passed over the bridge, the suction sweeping him off. He sustained a bump on the head. He was released from the hospital after examination.

Police theorized Davis may have fainted and fell from the bridge. He was permitted to continue on his way. He failed to give officers his destination.

JITTERY HEADACHE

(MORNING AFTER)

Don't go through the day with a "jittery" headache that racks nerves and kinders business. Take Capudine. Note how quickly head clears, nerves are calmed, no more drowsiness. Capudine is a new fountainhead in 30c and 50c bottles.

CAPUDINE

## Americans Must Remain at Home

Naval Convoys Unlikely in Face of U-Boat Threat Here

WASHINGTON.—(AP)—The sinking of the liner Athenia and generally perilous conditions abroad impelled the United States government Monday night to lay down a drastic new order preventing Americans from going to Europe except in case of "imperative necessity."

Officials considered a plan for assigning naval convoys to protect American ships bringing refugees from Europe. It was not certain that this would be done. There was some reluctance to send destroyers of the Atlantic squadron across the ocean for this purpose in view of unofficial reports that submarines are in the Caribbean sea.

Under regulations issued by the State Department, persons who have already received passports to travel to Europe, or persons who apply here-evidence "that it is absolutely necessary to take the trip."

Heavy penalties, ranging up to 5 years imprisonment and \$2,000 fine, will be sought against persons making misleading statements in applying for passports.

Sheriff Bright Offers Reward in Robbery Case

Sheriff Brad Bright of Prescott has announced that he is offering a \$10 reward for any information leading to the arrest and conviction of the burglars who robbed Clyde's Sandwich Shop, The Oak Grill and the home of Pat Simpson last Thursday night. As yet no trace of the robbers have been found.

The Morning After Taking Carter's Little Liver Pills

SOUR TEMPER MADE SWEET

When you are cross, irritable, and grouchy; when you find fault with the coffee, the eggs, the bacon, and the cook, you may well suspect that you have a touch of biliousness or so-called "torpid liver," so prevalent in hot weather. All you may need is a little Calomel, or better still, "Calotabs," the nauseous calomel compound tablets that make calomel-taking a pleasure.

Calotabs give you the combined effects of calomel and salts, helping Nature to expel the sour, stagnant bile and washing it out of the system. One or two Calotabs at bedtime with a glass of water—that's all. Next morning your system feels clean and refreshed, your head is clear, your spirit bright, and you are feeling fine with a hearty appetite for breakfast. Eat what you wish and go about your work or pleasure.

Genuine Calotabs are sold only in checker-board (black and white) packages bearing the trade mark "Calotabs." Refuse imitations. The package is ten cents; family package only twenty-five cents, at your dealer's (Adv.)

We have a complete assortment of Home Furnishings.

# Bombers' Effectiveness Lessened by Improved Anti-Aircraft Guns

By PAUL MANNING  
NEA Service Staff Writer

Thousands of airplanes dropping their deadly big explosive bombs as they suddenly roar in a flu-out attack over Paris, London and Berlin is one thought which has disturbed Europe's peace of mind during the past weeks of the war crisis.

But because anti-aircraft guns have improved tremendously since the World War this threat may not be so deadly as some military theorists claim.

For although airplanes can now fly three times as fast, ten times as far and twice as high with twice the load as they could during the World War, anti-aircraft fire is today so effective that any plane flying below 12,000 feet in good weather over a fortified city, industrial center or munition dump will be downed in less than fifteen

London is ringed with these mobile three-inch anti-aircraft guns which can travel 45 miles an hour over good roads and be set in position complete with sound equipment and directing units in twelve to fifteen minutes.

they reach their destinations.

Spain A Proving Ground for Guns

For the AA guns which Germany sent for trial by German crews—who guarded them against inspection by anyone, including Franco's officers—repeatedly dropped Russian bombers winging along at 200 m. p. h. at 12,000 feet.

The most effective German anti-aircraft guns are a double-barreled gun and a light-machine gun which fires below the high range of their more powerful 3-inch weapon. Their 3-inch gun is good but is outclassed by the 3-inch guns of the United States which can fire eighty to one-hundred aimed rounds a minute to 25,000 feet.

The most sensational anti-aircraft gun in Europe today is reported to be owned by Sweden. An 88 mm. mobile piece turned out in moderate quantities by the Swedish Bofors plant, it performed beautifully on trial for the Germans in Spain. The British, how-

This gun, just behind the Seigfried Line on the Western Front, is one unit of Germany's first line of defense against enemy bombers. Less effective than U. S. anti-aircraft guns to a similar type, it is nevertheless able to down any airplane flying below 12,000 feet in fair weather.

No Air Defense Is Infallible

That Germany is counting on the anti-aircraft gun in any coming war for protection, while the bulk of her airplanes are flying in counter-attack, is to be judged by the statement of her military defense experts that "the more than 400 anti-aircraft batteries guarding Germany will annihilate enemy airplanes before they reach Berlin."

No defense however can be established that will enable a country to say flatly that enemy airplanes cannot pass, U. S. military experts believe.

Judging by the performance of German anti-aircraft guns in the recent Spanish war, German, French and English anti-aircraft batteries will be sufficiently accurate to drop a big percentage of enemy bombers before

## CHILLS AND FEVER

Here's Relief From Malaria!

Don't let Malaria torture you! Don't shiver with chills and burn with fever.

At first sign of Malaria, take Grove's Tasteless Chill Tonic. A real Malaria medicine. Made especially for the purpose. Contains tasteless quinine and iron.

Grove's Tasteless Chill Tonic actually combats Malaria infection in blood. It relieves the freezing chills, the burning fever. Helps you feel better fast.

Thousands take Grove's Tasteless Chill Tonic for Malaria and swear by it. Pleasant to take, too. Even children take it without a whimper. Don't shiver and burn. At Malaria's first sign take Grove's Tasteless Chill Tonic. At all drugstores. Buy the large size as it gives you much more for your money.

## YOUR BABY — YOUR DOCTOR AND YOU

Advice to mothers on how to raise babies is plentiful and free in every community. From friends and relatives well-meant counsel is constantly heaped upon a mother's shoulders. Frequently the result is confusing and often detrimental to the baby. The best advice to any mother can be given in three words:

SEE YOUR DOCTOR!

When prescriptions are needed call . . .

France has many of these light anti-aircraft machine guns for defense against low-flying attack planes. Able to fire some 400 bullets a minute to 4000 feet, they are used as a strategic auxiliary to the larger guns.

ever, more than a year ago stepped in and outbid the Germans for the total output. British military observers say the gun has an effective range up to 20,000 feet.

French and Polish guns are good, but Poland has too few for adequate protection, while Parisians would probably feel much safer if more anti-aircraft batteries were between Paris and the borders.

Bombing Technique Continues Forward

Weather is the stumbling block for both anti-aircraft units and bombing planes. To get an airplane's range in outpost officer must first get the initial peering through a high-powered telescope. If the visibility is zero there is no accuracy. But by the same token a bomber can not bomb with accuracy unless it is sighted by the target.

The anti-aircraft improvement in fire, whereby airplanes can be driven to 20,000 feet over key zones, means that the bomber has lost some of its military usefulness. But aviation has countered the challenge by developing new bomb sights and oxygen-enriched engines that can use the air layer between 20,000 and 30,000 feet.

This new bomb-sighting device, which computes the speed of the plane, wind velocity, relative to the plane, altitude drift, distance and angle of the target enables a plane to bomb effectively from almost any height the target can be seen.

The disadvantage is that targets get smaller.

### Kansas vs. Missouri

LANSING, Kas.—(AP)—Of all places, Kansas is taking property from Missouri at its state penitentiary.

Lateral shift. If the convict-operated coal mine at the Kansas penitentiary ended under the state line in Missouri, miners sent up Missouri coal for use in Kansas state institutions.

## Washington Daybook

By PRESTON GROVER

WASHINGTON—The government has spent millions in designing battleships, roads, low-cost houses, kitchen aprons, drugstore glassed-in gardens and suspension bridges, but not one dime has it laid out in fashioning a comfortable suit of clothes for a man.

For seven cents, or maybe it is 13, you can get a pamphlet on window gardening. Experts will help you fight the Japanese beetle. Consular agents will sweat through a steaming summer in Java enduring malaria and chigger bites to help you sell an iceless refrigerator or a new brand of soda-water. But no government finger will be raised to work out a new scheme for clothes that, at the end of a hot day, won't hang on you like a potato sack.

We went into this thing with moderate thoroughness, considering the temperature. In fact, the temperature drove us to it. It seems to us that of all the services the government is so anxious to render it should be most eager to provide an improved dress for men, of which there are an awful lot.

He Seeks Assistance

We toured the Department of Agriculture almost from cellar to garret. That department above all others is charged with the task of looking out for man's most elemental needs.

They can tell you how to bake a blueberry pie, roast a duck, mix a cooling summer drink (non-intoxicating) or prepare a school lunch for a growing boy.

Down in the basement regions the department's architects and philosophers have drawn many plans for low-cost homes that should make farm life a thing of beauty.

So food and shelter they have attended to.

A huge wing of the department is given over to textiles. A person would think that there, if any place, a little wadk could be done in designing a non-binding air-cooled shirt. But no.

They tell women how to make simple household garments, how to rig up a low-cost outfit for the youngsters. They pioneered in designing and popularizing the sun suit for tiny tots. They publish illustrated pamphlets telling women how to spot fraud in a piece of textile and how to detect slipshod tailoring in a store coat. But not one room is given over to fashioning a pair of pants that won't need pressing every 48 hours.

He Gets Sympathy

There are sympathy for the idea of doing something for mankind. A young woman, head of the division, explained, however, that there never had been an appropriation from Congress for it.

"Did any one ever ask for one?" we asked.

"I don't remember, if they ever did," she replied.

She was cool and comfortable while we talked. She wore a striped cotton shirt open at the throat, a shirt and doubtless a light slip and other hidden essentials. That was all—except, of course, shoes and stockings.

Opposite her we sat willing in three layers of cotton, including a coat, shirt and undershirt, two of them tight woven. Our shirt was tightly buttoned around the throat to stop ventilation. Besides, we had on tightly-woven trousers and some more gear underneath.

Why the dickens doesn't somebody

## Headed for a Dunking

Bette Berkley, 17-year-old high school girl, tumbles Earlita Ward into the water to win women's championship log-rolling title at Longview, Wash., rodeo.

## The Young Lady and the Fast Black Bear

CODY, Wyo.—(AP)—A Cody doctor tells this one:

"A young woman was focusing her camera on a Yellowstone park black bear, which was being fed by another tourist.

"Food gone, the tourist threw the wrapper in the direction of the photographer.

"The bear jumped for the wrapper; the young lady thought he was after her. She screamed and ran. The bear, excited, dashed in pursuit. He was a fast-running bear and caught up with the young lady. He nipped her southernmost portion as she fled northward.

"The bite accelerated her speed. She easily outdistanced the bear and he never got a second nibble. I heard the story when she came to me to get the wound sewed. Meanwhile the tailor was repairing the southernmost portion of her black suit."

## "I Was Hungry Before I Got This Job—March"

COLUMBUS, O.—(AP)—Right off the Ohio penitentiary grapevine comes this account of a man's man.

A newly-appointed guard with an ex-amy step delivered this ultimatum to a convict company in the prison yard:

"I was hungry before I got this job. If it's marching the boss wants, I'm not going to be hungry again. You fellows are going to march hereafter—not stroll. Now, forward march!"

The company marched.

## Signs Of The Times Dep't

HOLLIS, Okla.—(AP)—The one-room school has vanished from Harmon county. The last one has just been merged with a consolidated district. The county now has nine large districts where ten years ago it had 32 smaller ones.

## Pay Day Approaches

LITTLEFIELD, Texas.—(AP)—The city commissioners haven't explained the logic behind their decision, but they have decided only the city firemen are entitled to receive city water free. Hereafter the mayor, commissioners, city attorney, secretary and other officials will have to pay.

## Sheik Pays Tribute Broadway Beauty

Learns About America From Its Comedians and Lovely Ladies

By GEORGE ROSS

NEW YORK—Touring Maharajahs are a dime a dozen around Manhattan and those Gothamites generally are quite indifferent to the presence of beturbanned and berobed caliphs.

So all the more credit to a recent potentate from the exotic East for having halted traffic on the streets, for having shaken the guests at night clubs out of summertime lethargy, and for having provided the columnist fiends with copy. He is the Sheik Mohamed Bin Isa Al Khalif of Bahrain who dropped in here to look around at our quaint Western ways and to see what this nocturnal whirligig is all about.

The Sheik does not compromise sartorially with the country in which he is an honored transient. He gets around, swathed in what an uncouth New Yorker would regard as bed sheeting, which contrasts starkly against his handsome and swarthy skin. He wears bejeweled moccasins and on his person are bright headlamps and tail lights of sparkling gems, not to speak of a sharply honed dagger. No wonder the pedestrians pause in their tracks to have a look at him.

Falls for Night Club Beauty

His excursions into the night life of the metropolis have been unwearying. Having heard from colleagues that the cabarets contain femininity that vies with the most fastidious potentate's harem, he checked up on such a wild rumor and found it to be perfectly true. The Sheik has expressed himself enthusiastically on the beauty of the American girl.

What's more, he has lavished upon at least two of them those rubies which visiting Maharajahs customarily bestow upon beautiful women. The recipient of such a gift was Mary Dowel, otherwise known as "Stutterin' Sam," and, by and large, the most beautiful and tallest showgirl in town.

"Stutterin' Sam," to show her gratitude, sent around to the Sheik's apartment a gift that she had previously saved up for another boy friend. It was one of those portable radios that require no hookups or aerials. The Sheik never had seen one and so delighted he still bears it along wherever he goes and tunes in. Cheap, he thinks, for a paltry ruby!

Given to Works By A Comedian

The Sheik Mohammed is unfamiliar with our harsh, violent, western ways, but he gradually is getting used to them.

The other evening, he sauntered into the Diamond Horseshoe where a comic named Frank Libuse impersonates a readwriter and torments the guests, by spilling soup down their spines, upsetting the table and insulting them.

Now Frank doesn't discriminate among the customers and when he saw the Sheik coming, pulled out every item in his bag of tricks. He wrapped a tablecloth around the Sheik's head to make his ensemble complete and was a droll nuisance for a few minutes.

Uninitiated into these antics, the Sheik's wrath rose slowly but surely. He unsheathed his dagger and was about to take reprisals against the hapless comedian. But aides in his party calmed him down and explained to the best of their talents, that this was one of those crude American jokes. No one was more delighted than the Sheik when he heard the apologetic explanation and he was the loudest to applaud for Libuse all night.

## Hickory, Dickery, Dock, the Mouse Ran Up the—

KENTON, O.—(AP)—The old nursery rhyme which goes "Hickory, dickery, dock," has a new meaning to Harry Small.

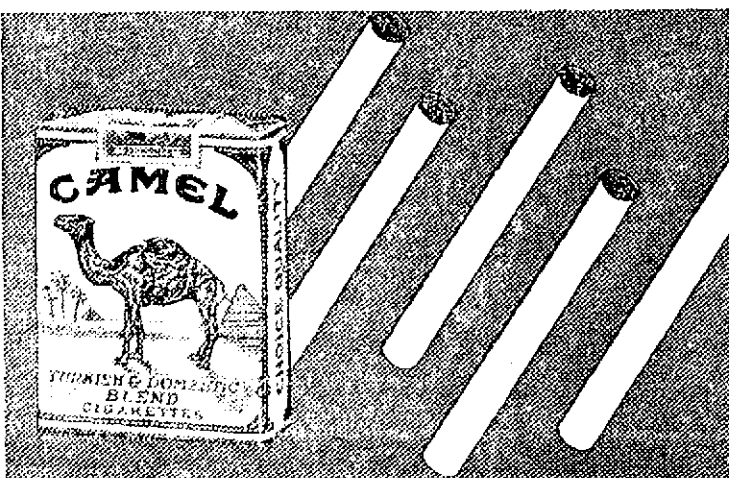

Hunting rats on his farm, Small reported that a huge one became confused and scrambled up his pants leg. The farmer did some scurrying of his own on the ground until the rat ran out, only to dash up the other trouser leg.

Finally getting the rat out, Small filled it with a shot.

Whatever price you pay per pack, it's important to remember this fact: By burning 25% slower than the average of the 15 other of the largest-selling brands tested—slower than any of them—CAMELS give a smoking plus equal to

# 5 EXTRA SMOKES PER PACK!

Penny for penny your best cigarette buy

# CAMELS LONG-BURNING COSTLIER TOBACCOS

Sixteen of the largest-selling cigarette brands were compared recently in impartial scientific tests by a leading laboratory. The results:

- 1 CAMELS were found to contain MORE TOBACCO BY WEIGHT than the average for the 15 other of the largest-selling brands.
- 2 CAMELS BURNED SLOWER THAN ANY OTHER BRAND TESTED—25% SLOWER THAN THE AVERAGE TIME OF THE 15 OTHER OF THE LARGEST-SELLING BRANDS! By burning 25% slower, on the average, Camels give smokers the equivalent of 5 EXTRA SMOKES PER PACK!
- 3 In the same tests, CAMELS HELD THEIR ASH FAR LONGER than the average time for all the other brands.

MORE PLEASURE PER PUFF—MORE PUFFS PER PACK!
